Note

If you have a micro SIM, you may use an adapter to insert it into your tablet. If your tablet fails to recognize the SIM, please try using a different adapter.

USING YOUR TABLET

Using the SIM card slot

Certain tablets include a SIM slot for internet access. To take full advantage of your tablet's Internet capabilities, you should install a SIM card with data subscription *before* turning on your tablet.

Charging your tablet

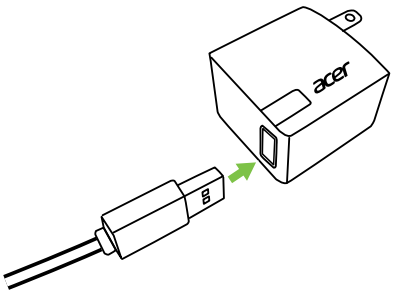
For first-time use, you need to charge your tablet for four hours. After that you can recharge the battery as needed.

Assembling the power adapter

Your tablet is bundled with one of two types of USB power adapters: a fixed-prong type or a removable-prong type. Both types are described in this manual.

Fixed-prong type

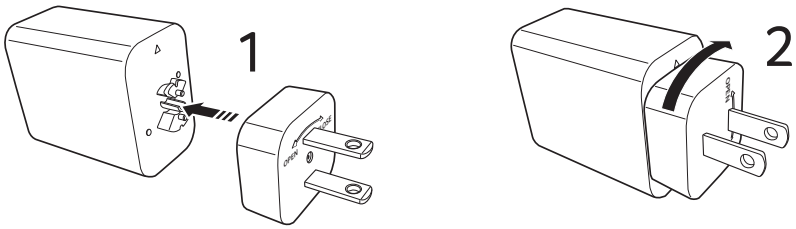
The prongs and power adapter body form a complete piece, no assembly required. Simply slide the large end of the USB cable into the power adapter body (it will fit in only one direction). You cannot remove or switch the prongs with this type of adapter.



Removable-prong type

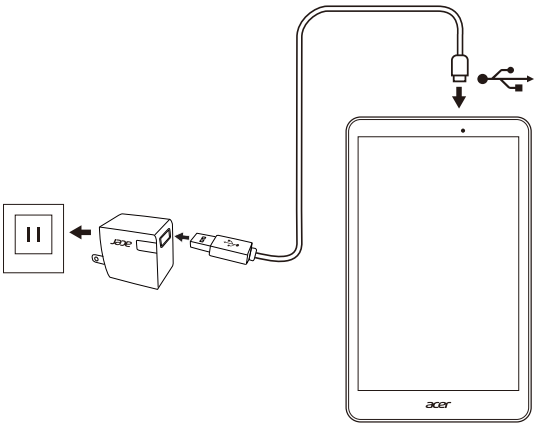
Align arrows on the power adapter head and body. Insert the head onto the power adapter body and turn the head towards "CLOSE" printed on the head until it clicks into place. Simply slide the large end

of the USB cable into the power adapter body (it will fit in only one direction).



Connecting power

Connect the power connector to your tablet and plug the AC adapter into any AC outlet.



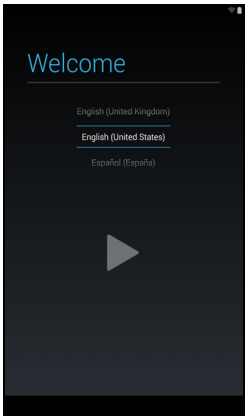
Warning
Only use Acer power adapters to charge your device.

Note
It is normal for the tablet surface to become warm during charging or long periods of use.

Turning on for the first time

To turn on your tablet, press and hold the power button until you see the Acer logo. Wait a moment for your tablet to boot up. You will then be asked some questions before you can use your tablet.

To start, tap to select your language then tap the arrow. Follow the rest of the instructions as they are displayed.



If the tablet's screen turns off, it has entered sleep mode. Briefly press the power button to wake it up. For more information **see Waking your tablet on page 19**.

Sign in to or create a Google account

If you have internet access, your tablet allows you to synchronize information with a Google account.

During the start-up process, you may create or sign in to an account, which will be used to synchronize your contact list, email, calendar

and other information. If you do not yet have internet access, or do not want to use this feature, then tap **Skip**.

Important

You must sign in to a Google Account to use Gmail, Hangouts, Google Calendar, and other Google Apps; to download applications from Google Play; to back up your settings to Google servers; and to take advantage of other Google services on your tablet.

If you want to restore existing settings from another device with Android 2.0 (or later) installed, you must sign in to your Google account during setup. If you wait until after setup is complete, your settings will not be restored.

For some applications, such as *People* or *Calendar*, all changes that you make on your tablet are made to the synchronised copy on the internet. Other applications only copy information from account on the internet; the information on your tablet cannot be changed directly, you must change the information stored in the internet account.
